

Enhancing User Experience in SuccessFactors

Unrivaled Communication

TalentTalk elevates organizational communication by seamlessly integrating SMS capabilities across the employee lifecycle from initial candidate outreach during recruitment to timely notifications for employees, such as upcoming work permit expirations. *Let Joule answer candidate queries through SMS**

Enhanced Experience

With **TalentConnect**, your top candidates will spend less time re-entering information that they have already submitted on job boards. For the hiring team, we streamline the process by removing manual follow-ups through automated reminders.

Flexible Connectivity

TalentFeed revolutionizes the integration of Job Feed XML with leading job portals such as Indeed and LinkedIn. By transforming complex, multi-location job postings into streamlined, single-location records, it enhances compatibility, scalability, and data security.

Key Capabilities Highly scalable & isolated client tenants - Ensures a fully-native user experience through BTP - Accelerates & improves the user experience
